

Valco Instruments Co. Inc.

CE information

Since the VICI products listed on this document are designed as components to be embedded into other systems, they do not include a power supply. Therefore this self declaration is only for the CE Standards listed below. These results do not substitute for, preclude, or guarantee passage of any or all relevant compliance testing as required for a final product that includes these components. The test results are provided to show that they are designed to be compliant when properly installed and tested in a system.

Manufacturer: Valco Instruments Co. Inc.
P. O. Box 55603
7811 Westview Drive
Houston, Texas 77055 USA
