M Series Diluter/Dispensers

- Full liquid handling functionality
- Self-priming
- No syringes
- Compact design
- User method locking protection
- Largest volume range available
- Easy to use Wizard format does away with math problems and charts

"Smart" hand probe
The hand probe signals the operator when an aspirate or dispense step is completed. The unique design also allows the use of fixed or disposable probe tips, as well as other accessories.

Program memory
Up to 100 programs can be permanently stored.

Multi-solvent option
A multiposition stream selection valve can be easily integrated with the pump for multi-solvent applications.

Printer option
Print out methods, sequential steps, time/date/operator stamp, titration and tubing volume values.

Applications
- Simple dispensing of reagents using the MANUAL dispense mode
- Micro dispensing in microplates and genomic arrays
- Dilutions for AA, ICP, GC, and HPLC samples
- Serial dilutions for all samples
- Multi-sample and reagent additions, micro-plates, tube to plate, tube to tube
- Small and large volume dispensing of reagents
- Titrations

Description
Cheminert M Series diluter/dispensers simplify the sample preparation process for dispensing and diluting liquids. The user-friendly Wizard format eliminates all the math calculations and charts usually associated with diluting and dispensing applications. Just enter the dilution ratio and the final volume, and the correct volume is calculated and automatically dispensed for each ratio.

For multiple dispenses, you simply enter the volume and the number of dispense repetitions, and the Wizard calculates the total volume to be aspirated. It’s that easy!

The diluter/ dispenser is built around a patented syringe-free, bi-directional, positive displacement pump. This design approach gives the largest volume range available, and eliminates the inconvenience of having to change and refill syringes.
