With the acquisition of DBS Strumenti Scientifici SpA in January 2016 the VICI group of companies broadens its array of products for the analytical industry. This includes temperature control accessories for chemical analysis and a range of hydrogen, nitrogen and zero air generators for analytical instruments such as GC, GC/MS and LC/MS. The modern facilities cover a total of 1,500 M² (16,000 sq. ft) manufacturing in accordance with the UNI EN ISO 9001:2008 quality systems.

VICI DBS is a world-renowned manufacturer of high quality gas generators for analytical applications. Our innovative products bring significant, solution based benefits to all scientific users across all market sectors. Our product development approach is intelligent and customer focused, led by real user needs and benefits.

VICI DBS products are designed and manufactured at the VICI facility in Padova, Italy with administration support for customers in Europe, Asia, and Africa directed from VICI AG International in Schenkon, Switzerland.

In 2017, VICI DBS USA opened in Houston, Texas to serve the US, Canada, Central America, and South America.

Since 1968, VICI Valco Instruments Co. Inc. USA has been the leading designer and manufacturer of standard and custom components for precision analytical, biomedical, and biocompatible instrumentation.

In 1981, VICI expanded into Europe with the founding of VICI AG International in Switzerland. Our product portfolio includes valves and fittings, pneumatic and electric actuators, metal or polymer tubing and sampling loops, heated enclosures, valve sequence and temperature controllers, flow controllers, pumps and GC detectors.
VICI DBS Hydrogen Generators offer a safe, economical and convenient alternative to gas cylinders. The PG Plus Series provides superior performance with proprietary electrolytic cell technology combined with high quality components and a unique hydrogen drying solution. Ideal for use with gas chromatography detectors such as FID, NPD, and FPD.

**PG Plus Series**

Ideal for all GC detector applications

VICI DBS Hydrogen Generators offer a safe, economical and convenient alternative to gas cylinders. The PG Plus Series provides superior performance with proprietary electrolytic cell technology combined with high quality components and a unique hydrogen drying solution. Ideal for use with gas chromatography detectors such as FID, NPD, and FPD.

**PG PLUS SERIES FEATURES:**

- Flow rate from 100 to 600 ml/min
- Purity 99.9996%
- Pressure up to 11 bar (160 psig)
- Minimal maintenance
- Unique drying membrane - no desiccant cartridges required
- Unique 100% titanium electrolytic cell
- 2 year standard warranty

**Cascading – the ability to install several hydrogen generators in parallel**

- Higher flow rates up to 10 lpm
- Automatic flow compensation in the event of unplanned down-time
- Continuous operation for critical applications

*Never run out of high purity hydrogen again!*
The NM Plus Series enhances the high performance of the PG Plus with the addition of a unique no maintenance purification system. This results in ultra high purity carrier grade gas. With its highly sophisticated software control and safety alarm capability it presents the GC user with the opportunity to reap the benefits of hydrogen carrier gas while overcoming the safety concerns.

NM PLUS SERIES FEATURES:
- Flow rate from 100 to 1000 ml/min
- Purity 99.99996%
- Pressure up to 11 bar (160 psig)
- No maintenance
- USB for remote monitoring and servicing
- Unique 100% titanium electrolytic cell
- 2 year standard warranty
This clever instrument combines the reliability of our hydrogen and zero air generators into one compact and convenient package. Available in both high purity PG Plus and Ultra high purity NM plus configurations, the FID station can be ordered in either of two different styles – flat for placement under a GC, or the FID tower to conserve bench space. Available in a variety of H₂ flow ranges up to 1 L/min and zero air flow rates up to 5 lpm.

FID GAS STATION FEATURES:

- H₂ flow rate from 100 to 1000 ml/min
- H₂ purity options 99.9996% or 99.99996%
- H₂ pressure up to 11 bar (160 psig)
- Zero air flow rates 1.8 or 5 lpm
- Zero air purity <0.1 ppm
- Minimal maintenance
- H₂ and zero air in a single solution
Hydrogen 19” Rack Plus

For Continuous Emission and Air Monitoring Applications

The same features found in our laboratory gas generators are now available in industry standard 19” rack mount format – top quality, ultra safe, supremely reliable, and economical hydrogen generation in a convenient and compact package.

HYDROGEN 19” RACK PLUS FEATURES:

- $H_2$ flow rates from 100 to 1000 ml/min
- $H_2$ purity options 99.9996% or 99.99996%
- $H_2$ pressure up to 11 bar (160 psig)
- Zero air flow rates 1.8 or 5.0 lpm options
- Zero air purity <0.1 ppm
- Minimal maintenance
VICI DBS nitrogen generators are engineered to transform standard compressed air into a safe regulated supply of Ultra High Purity nitrogen. Utilizing a superior quality carbon molecular sieve (CMS) and innovative column switching, the nitrogen generators require minimal maintenance and operator attention.

**Nitrogen Generators**

*For Gas Chromatography and Analytical Instrument Applications*

NITROGEN GENERATOR FEATURES:

- Flow rates from 500 to 4,000 ml/min
- Purity up to 99.999%
- Pressure up to 5 bar (75psig)
- Space saving design
- Optional hydrocarbon removal for GC applications
- Ideal for GC carrier gas including ECD, make up gas, TOC, DSC, and ELSD applications
The Mistral Evolution and Whisper nitrogen generators have been specifically designed to meet the flow, pressure and purity requirements of all the leading LC/MS instrument manufactures. Nitrogen is produced by either carbon molecular sieve (CMS) or hollow fiber membrane technology, depending on the exact user requirements. Generators are also available with integral compressors, providing a complete “plug and play” solution.

**MISTRAL EVOLUTION AND WHISPER SERIES FEATURES:**

- Flow rates from 10 to 120 lpm
- LC/MS grade hydrocarbon free nitrogen
- Pressure up to 8 bar (116 psig)
- Oil free, low noise compressor options
- Specialist hybrid air and nitrogen options for Agilent Microwave Plasma and Sciex LC/MS/MS
VICI DBS GC and GT Zero Air Generators are designed to supply ultrapure hydrocarbon free zero air for GC-FID applications. Catalytic oxidation technology eliminates hydrocarbons to <0.1ppm resulting in a flat and stable baseline, increased sensitivity and repeatable analysis.

For more demanding applications such as TOC, Continuous Emissions Monitoring and process control applications the GT Zero Air Generator removes CO, CO₂, NOₓ, SOₓ and water vapor.

**GC & GT ULTRA-ZERO AIR FEATURES:**

- Flow rates from 1 to 30 lpm
- Pressure up to 6.5 barg (95 psig)
- GC zero air purity <0.1ppm
- GT zero air purity <0.1ppm HC, <5 ppm CO₂, <0.1 ppm CO, <0.1ppm NOₓ and SOₓ
- Minimal maintenance
- Also available in a 19” rack option
VICI DBS – TECHNOLOGY YOU CAN TRUST
VICI DBS is a leading innovator and manufacturer of high purity gas systems for analytical laboratories. Generators are specifically designed to meet the stringent gas requirements for all the leading GC and LC/MS instrument manufactures.

WHY A GAS GENERATOR?
Gas generators offer a safe, convenient and cost effective alternative to gas cylinders and dewars. A VICI DBS generator provides you with a dependable, easy to use and on-demand supply of ultra high purity gas.

PATENTED TECHNOLOGY
Utilizing VICI DBS’s range of patented proprietary technologies, there are 10,000 systems installed worldwide. These technologies offer unique performance benefits, including guaranteed ultra high purity gas, silent operation, minimal moving parts and minimal operator attention.

ISO 9001 2008 CERTIFIED
Operating from our ISO 9001 2008 accredited gas generator manufacturing center in Italy, every VICI DBS product is designed and tested to ensure compliance with the relevant safety standards. All generators meet and exceed the requirements for CE, CSA-C-US, and FCC.

SAFE
Eliminate health and safety issues and requirements for managing, moving and storing high pressure gas cylinders. No concerns with the storage of flammable hydrogen gas or the sudden accidental release of high pressure gas from a cylinder.

COST EFFECTIVE
Minimal generator maintenance costs. Eliminate ongoing costs associated with cylinders, such as the volatility of gas prices, delivery and rental costs, and unplanned downtime.

CONVENIENT
No instrument or application downtime as a result of running out of cylinder gas. Gas generators provide a 24/7 reliable on-demand supply.

IMPROVE PERFORMANCE
Consistent, reliable on-demand supply of gas, at stable high purity and pressure, improves sensitivity and reproducibility.
