Universal Actuator Tutorial

Part 1: Downloading the USB Drivers

Many users may be proficient at downloading and installing drivers in a Windows environment. If that is your situation you may wish to skip parts 1 and 2 of the tutorial and go directly to part 3, “Verifying Actuator Communication.”

2. Move your mouse over PRODUCTS in the top navigation bar to open the product menu.
3. Under ACTUATORS, select Universal.
4. On the universal actuator page, click on the **USB drivers** link under **MORE INFORMATION**.

5. When prompted, choose to save the file, rather than opening it.

6. Then click **OK**.

7. Select an appropriate download location. Often that will be Downloads or My Downloads – just make sure to remember where it’s getting saved.

8. Click **Save**.
